

## MARINE, ENERGY & CONSTRUCTION LIABILITY

## ASPEN INSURANCE

Our insurance business comprises property, casualty, marine, energy and transportation, and financial and professional lines.

At our London base, Aspen Insurance is a significant writer of traditional property and casualty lines, and a leading specialist in energy, marine, aviation, financial and professional lines, specie, credit and political risks, kidnap ransom and piracy cover, and excess casualty.

Our London Market and UK domestic insurance business, along with risks in Ireland and Switzerland, is underwritten on Aspen Insurance UK Limited and Lloyd's of London paper, the latter through our Lloyd's Syndicate 4711.

## MARINE, ENERGY & CONSTRUCTION LIABILITY

Our highly experienced team has been building a valuable, balanced portfolio based on long-standing client relationships since it was formed in 2004.

We write one of the broadest offerings in the London liability market through both our own and Lloyd's platforms. We offer coverage tailored to client requirements, combined with the highest level of service in underwriting and claims.

The team writes marine, energy and construction liabilities – on and offshore – at a variety of attachment points, including at primary levels where appropriate. Our marine account offers protection and indemnity, and maritime employers' coverage, although we consider other marine coverage. Our energy account considers clients from upstream through the entire process up to and including downstream risk. Our construction account writes US homebuilders only. We conduct all of our business through authorized brokers.
