I CYBER LIABILITY

At Aspen, we are industry veterans who not only understand cyber insurance products, but have a depth of knowledge in the underlying fields of privacy and network security and technology liability. Employing a selective distribution model, we offer best-in-class service to our broker partners and clients. We deliver the benefits of a global corporate footprint with regionally accessible underwriting and claims contacts. And with both primary and excess products, along with the ability to support custom broker language, we can help manage cyber risk either via full participation or quota share.

More than a policy – a risk management program

With an integrated underwriting and claims team who has seen it all, you can rest assured that with Aspen, your clients are benefiting from years of deep expertise, as well as carefully selected, built-in incident response services. Our robust risk management services are an important part of what we offer; we understand risk and by supporting our customers before, during and after an incident, we add value to their service and help mitigate the impact of claims.
